LogicFast

Standard Project Agreement

Template — fill in the blanks for your project, agree the details in writing, and both sides sign. Bilal personally leads every project. If anything here conflicts with the written scope agreed for your project, the written scope applies.

Project details

Client name: _____

Business: _____

Project: _____

Fixed cost (PKR): _____

Advance — 50% on signing (PKR): _____

Balance — 50% on live (PKR): _____

Timeline (weeks): _____

Start date: _____

1. What we build

LogicFast builds the project described in the written scope agreed with you before work starts. Anything beyond that scope is quoted separately in writing before we start it.

2. Fixed cost

The fixed cost above is agreed in writing before work starts. There are no hidden charges. Domain registration and hosting are **not included** in the fixed cost — they are arranged separately.

3. Payment

50% advance is due on signing, and work starts once the advance is received. The remaining 50% is due when the website goes live. Pay by JazzCash, EasyPaisa, or bank transfer.

4. Revisions

Suggested default: 2 revision rounds per page are included in the fixed cost. Further rounds are quoted separately in writing.

5. Timeline and delays

The timeline above runs from the agreed start date. If content or feedback from you arrives late, the timeline moves by the same amount — and we will tell you in writing.

6. Ownership

You own the finished website — its code, content, and documentation — once the full payment is made. LogicFast may show the completed work in its portfolio unless you ask otherwise in writing.

7. Security review

Every launch includes a security review (headers, TLS, and best practices). No website can be called 100% secure, and this review is not a guarantee against future attacks.

8. Support after launch

Suggested default: 30 days of free post-launch support for defects — things we built that do not work as agreed. New features or changes after launch are quoted separately.

9. Cancellation and refunds

Suggested default: if you cancel before work starts, your advance is refunded in full. After work starts, refunds follow the LogicFast Refund & Cancellation Policy (logicfast.co/refund): payment for work already done cannot be refunded, and domain, hosting, or third-party purchases cannot be refunded once bought. If LogicFast cancels without delivering the agreed work, you receive a refund for the undelivered part.

10. Rush delivery

Suggested default: rush delivery is a paid add-on, quoted in writing and agreed before work starts.

11. Resolving disagreements

If something goes wrong, talk to us first — most issues are solved with a direct conversation. This agreement is governed by the laws of Pakistan. If a dispute cannot be resolved through discussion, it will be subject to the courts of Gujranwala, Punjab.
